EDUCATION

Iowa State University *2013 - 2018*

Ph.D. in Genetics and Genomics
Plant Sciences Institute and Brown Graduate Fellow
Zaffarano Prize and Karas Award Recipient

Iowa State University *2009 - 2013*

B.S. in Genetics
summa cum laude
Honors Program

RESEARCH EXPERIENCE

Postdoctoral Researcher July 2019 (Expected)
Laboratory of Philip Benfey, Duke University

Postdoctoral Researcher December 2018 - July 2019
Laboratory of Yanhai Yin, Iowa State University

- Led NSF funded project *Network Based Discovery of Brassinosteroid Regulation of Plant Growth and Stress Responses in Arabidopsis* which aims to expand and characterize Brassinosteroid transcriptional networks through the integration of mRNA, protein and phosphorylation profiling experiments.

Graduate Research Assistant March 2014 - 2018
Laboratory of Yanhai Yin, Iowa State University

- Uncovered several mechanisms by which plants mediate the trade-off between growth and stress responses by investigating the degradation of BES1 transcription factor in Brassinosteroid signaling. Used genetic, genomic, biochemical and cell biology techniques to characterize BES1 interacting proteins and their role in degrading BES1, which is necessary for optimal plant fitness under drought or nutrient limiting conditions.
- Led a team of graduate and undergraduate students in a large scale phenomics project to study Brassinosteroid-mediated growth and stress responses. Integrated network analysis with high throughput phenotyping to identify critical transcription factors mediating Brassinosteroid responses and characterized their roles in controlling Brassinosteroid and drought responses.
- Developed Robotic Assay for Drought (RoAD) system for automatic weighing, watering and 3D imaging of plants during drought stress conditions. Collaborated extensively with a multidisciplinary team of biologists, engineers and computational scientists to design, plan and build the RoAD system.

Graduate Research Assistant June 2013 - March 2014
Laboratory of Steven Rodermel, Iowa State University

- Studied interactions between the plastoglobule and thylakoid subcompartments of chloroplasts using a second-site suppressor of *immutans* in *Arabidopsis* deficient in a plastoglobule redox component. Devised genetic, biochemical and molecular experiments to determine the mechanism of suppression and redefine the model of interaction between these suborganellar structures.

Undergraduate Research Assistant 2011-2013
Laboratory of Steven Rodermel, Iowa State University

- Performed hypothesis driven, independent research in genetics and molecular biology using the Arabidopsis mutant *immutans* as a model system to study chloroplast biogenesis and function.
- University Honors Program Capstone Project: Alternate Pathways of Electron Transport in the Plastid: Modulation of VTE1 in *immutans*.

TEACHING

Teaching Assistant <i>Genetics Laboratory (Genetics 313L)</i>	Spring 2018 <i>Iowa State University</i>
Guest Lecturer <i>Molecular Genetics (Genetics 409)</i>	Fall 2016 <i>Iowa State University</i>
Lectured on Trp attenuation mechanism and designed in class activity to promote student interaction and discussion.	
Guest Lecturer <i>Transmission Genetics (Genetics 510)</i>	Spring 2016 <i>Iowa State University</i>
Led paper discussion covering the genetics of the Wnt signaling pathway.	
Tutor <i>Principles of Genetics (Genetics 313)</i>	Fall 2012 <i>Iowa State University</i>
Undergraduate Teaching Assistant <i>Principles of Genetics (Genetics 313)</i>	Fall 2011 <i>Iowa State University</i>
Undergraduate Teaching Assistant <i>Genetics Laboratory (Genetics 313L)</i>	Fall 2011 <i>Iowa State University</i>

MENTORING

Mentor in Research Experience for Teachers Program	
Nick Smith, Eagle Grove High School	2017-2018
Brent Chambers, Bellevue High School	2014
Mentor for First Year Graduate Students	
Tanner Cook	2018
Ashley Paulsen	2017
Basanta Bista	2017
Max McReynolds	2016
Jie Tang	2016
Mentor for Undergraduate Lab Assistants	
Ashley Hurd	2018-Present
Nicole Huser	2016-Present
Sean McLaughlin	2016-Present
Jessica Parrott	2016
Paige Rassel	2016
Kyle Small	2016
Ben Brennan	2014-2015

AWARDS AND FELLOWSHIPS

Zaffarano Prize for Graduate Student Research <i>Iowa State University</i>	2019
--	------

Karas Award for an Outstanding Dissertation <i>Iowa State University</i>	2019
Genetics, Development and Cell Biology Award <i>Iowa State University</i>	2019
Genetics and Genomics Research Excellence Award <i>Iowa State University</i>	2018
Biochemical Journal Poster Award - 1st Place <i>3rd International Conference on Brassinosteroid Research, San Diego, CA</i>	2018
Best Poster Presentation by a Graduate Student <i>Loomis and Crop Bioengineering Consortium Meeting, Ames, IA</i>	2018
Brown Graduate Fellow <i>Iowa State University</i>	2016-2017
Plant Sciences Institute Fellow <i>Iowa State University</i>	2013-2017
Travel Awards	
Crop Bioengineering Center Travel Grant <i>Iowa State University</i>	2019
W.E. Loomis award for travel to Plant Biology Workshop on Plant Development and Drought Resistance <i>Iowa State University</i>	2018
W.E. Loomis award for travel to Plant Biology <i>Iowa State University</i>	2017
W.E. Loomis award for travel to Plant Biology <i>Iowa State University</i>	2017
W.E. Loomis award for travel to Plant Biology <i>Iowa State University</i>	2016
GDCB travel award to the ICAR <i>Iowa State University</i>	2015
Best Oral Presentation by a Graduate Student <i>Post-transcriptional Gene Regulation in Plants Meeting, Austin, TX</i>	2016
Best Poster Presentation by an Undergraduate Student <i>ASPB Midwest Meeting, Chicago, IL</i>	2013
Research in Genetics Summer Undergraduate Internship <i>Sui Tong Chan Fung Fund for the Promotion of Study, Iowa State University</i>	2012

GRANTS

Network-Based Discovery of Brassinosteroid Regulation of Plant Growth and Stress Responses in Arabidopsis <i>PI: Yanhai Yin Co-PI: Justin Walley</i>	2018-2021
Role: Led the development and writing of this funded proposal from the NSF Division of Molecular and Cellular Biosciences Cellular Dynamics and Function cluster.	
Crosstalk between Brassinosteroid and autophagy pathways in the regulation of plant growth and stress responses <i>PI: Yanhai Yin Co-PIs: Diane Bassham and Justin Walley</i>	2017-2020
Role: Generated preliminary data, participated in writing and designed experimental approach for this funded NIH R01 proposal.	

PROFESSIONAL ACTIVITIES

Sigma Xi Scientific Research Society <i>Full member</i>	2019
Graduate Student Representative <i>Genetics, Development and Cell Biology Faculty Search Committee</i>	2017
Crop Bioengineering Center Member <i>Iowa State University</i>	2014-Present
American Society of Plant Biologists Member	2012-Present
Ad Hoc Reviewer	
Independent manuscript reviews	
<i>Planta</i>	2019
<i>Plant Cell</i>	2018
Mentored reviews under Dr. Yanhai Yin	
<i>New Phytologist</i> and <i>PNAS</i>	2018
<i>Developmental Cell</i>	2017
<i>Plant Biotechnology Journal</i>	2016
